

Guide to Tax Parcel Files Available for ELLA Municipalities

The following towns currently have ELLA members. In the few cases (Cornwall, Pleasantville) where town tax maps are separate from village tax maps, the town and village tax maps have been merged so that one map covers the entire town. ELLA member John Ladd has created kmz files from the publicly available shape files using the Shape2Earth plugin in MapWindowGIS (<http://www.mapwindow.org/>) to create kml files and then GoogleEarth to create kmz files. The various public tax parcel files are not consistent in terms of the identifying parcel information provided, so we will have to experiment with what works for each CAC or EAC.

	Parcel shape files exist*	Parcel shape files available to the public	kmz file
DUTCHESS COUNTY ♦	http://geoaccess.co.dutchess.ny.us/parcelaccess/		
Beacon	yes	yes
